Every step you take I'm with you,  
Every single day I kiss you  
Everywhere you go I'm with you hope you know I miss you  
and I wait here til the end of time

(Duke Sheltic)

It was at midnight, cold n also rainy outside  
it was like, the best ya did callin me in this tragic night  
it was like, totally weird hear ya cryin on the phone  
it was like, crazy hear ya talkin bout ya wife about to die,

ya told me she gon paralyse by some crazy affections  
they had to get your baby boy now by caesarean section  
that was her choice, to live or let go,  
this means either she would live or your son will get born,

must have been terrible stayin there not to know what's goin on  
n'hear your girl screamin « get him outta my womb  
n take care well of our lil baby boy n give him all your luv  
n I will do what I'll be able to, to help y'all from above

tell him I'll be there, when eva he need a hand  
n' tell him I'll be definitely there, when eva he say my name  
I will be at his first schoolday, n' all the way long  
coz he's my greatest pride my blood, I'll always luv you son »

Chorus

(Jessy Howe)

(Duke Sheltic)

Anotha day at grave, anotha day we leave the cemetery,  
talk about your life, your wife n how you got worried  
how to make it you say, « I don't know what to  
I got no job live from the walfare can't even buy my boy some shoes,

but I'll slog away to make my son be alright  
he's my lil sunshine and, he's Daddy's greatest pride  
everytime I look in his eyes I get in flight  
he's like a divine, for me this is the most precious time

I'm kinda helpless, n lost don't even know how to dress him  
how to change his diapers how to feed him, oh god bless him  
the only thing I can do, is not to miss a single minute  
n' I promise he'll never gonna miss Daddy's good night kissing

listen, my friend I can't wait, to c his 1st tooth  
callin me daddy the first time, make his first steps too  
we make mummy be so proud I know she's with us everyday  
coz every single night in my dreams I hear her voice sayin...
